From the Town Hall

The Town of Savannah continues to be very busy addressing the challenging need for a water filtration system which the Department of Health is requiring of the water department. A preliminary report was just presented to the Town Board and we will continue to look for ways to make this feasible for Savannah.

The final public meeting was held for the Vision Workshops which were directed by Maren King of SUNY-ESF funded by the Town of Savannah and a grant from the New York State Office of Small Cities. A formal report will be submitted to the Town Board but the Town Board is already looking for ways to put some of these proposals into action.

Meanwhile the Joint Comprehensive Master Plan for the Village of Clyde, Town of Galen and Town of Savannah is just getting underway. A community survey was conducted in October of 2008 followed by Public Information Meetings in both Clyde and Savannah. A list of strengths, weakness, threats and opportunities were compiled regarding our towns. This information is helpful as we continue to plan for the future of our communities. In March more public workshops will be held as they seek to set goals for our towns. Keep an eye out for these dates and be sure you can attend and provide some positive ideas for preparing for the future. Greg Donk, Brian Secor and Supervisor Ken Lauderdale are members of this steering committee and I am sure they will welcome any of your thoughts.

No Building permit will be issued until either an exemption from Workman's Compensation is provided or a copy of the contractor's Workman's Compensation Insurance is provided.
